Project: # 2

Project Name : Jobsfactory-JobFair
Client Name : Career Tree
Team Size : 1
Technology : PHP, Smarty, HTML, CSS, JavaScript, JQuery, MySql
Duration : November 2016 to December 2016
Site URL : http://www.jobsfactory.in

Description:

Jobs Factory is an online portal which is aimed at supporting prospective candidates looking for jobs in frontline roles in companies that demonstrate fair employer approach and policies. Traditionally, candidates for all frontline jobs are hired either through advertisement, campus hiring, and sourcing through employment exchange support. As a result many organizations have challenge in reaching out to the potential / deserving candidates and vice-versa owing to the inaccessibility for both to reach each other. This portal tries to bring both the stakeholders together.

Project: # 3

Project Name : CTHiring
Client Name : Career Tree
Team Size : 2
Technology : PHP, Smarty, HTML, CSS, JavaScript, JQuery, MySql
Duration : Dec 2017 to Present.

Description:

The objective of the software is to create a advanced version of hiring software using the Hire craft reporter online as a core and integrate all the essential features of the Hire craft third party software into the new online software. So that the ES team will able to do all functions in the new software regardless the need of existing Hire craft third party software.
