- Completed “Computer Fundamentals (MS-Word)” (2005) certificate at A.K.U. High School Kaikamba , Mangalore.

---

### ***ACADEMIC PROJECTS***

#### **M.Tech Project**

- Project title: Application Level Traffic Routing Optimization
- Technology : Java
- Description: The adoption of application-level routing that chooses an end-to-end traffic route relaying other end-hosts can improve certain user-perceived performance factors. In this project, focus on application level selfish routing. Here, the source directly chooses the routing path.

#### **B.E Project**

- Project title: Preventing Software Piracy Using Portable E-Key
- Technology: .NET

- Description: Portable E-Key allows the installation of software only for authorized users. System authentication is provided using encrypted activation key which is generated from hard disk number. The encrypted unique key will be stored in the USB flash drive.
